Booker T. Washington

Comparing Washington and Dubois

Washington-industrial education, economic equality, knowledge, equality of economic position, pursue equality, self empowerment, confidence, moral independence, South(Black Belt), born a slave, small steps(gradual change), bottom up, use what you already have

Dubois- respect, already equal, higher education, equality of civil and political rights, political power, North, born free, giant leap(radical change), top down

Both Washington and Dubois were very significant people and had important plans for blacks but they were brought up in two total different areas. They both have different beliefs and they do not understand each other because one is from the North and one is from the South.
