## 1.2.x. Exercise questions

- Suppose you know that a certain argument is valid but do not know whether its premises and conclusion are true or false. If you are given one of the further items of information **a-c** about the premises of the argument, what if anything can you say about the truth value of its conclusion?
  - **a.** The premises are all true.
  - **b.** The premises are all false.
  - **c.** Some premises are true and some are false.
- 2. Suppose that  $\varphi$ ,  $\psi / \chi$  is an argument that you know to be valid. If you find that the conclusion  $\chi$  is false, what if anything can you say about the truth values of the premises  $\varphi$  and  $\psi$ ?
- For each of the following items of information, tell what you can conclude from it about the equivalence of sentences φ and ψ.
  - **a.**  $\varphi$  and  $\psi$  are both true
  - **b.**  $\phi$  and  $\psi$  are both false
  - **c.**  $\phi$  is true and  $\psi$  is false
  - **d.** There is a sentence  $\chi$  such that  $\chi$  and  $\varphi$  together entail  $\psi$ , and  $\chi$  and  $\psi$  together entail  $\varphi$  (i.e.,  $\chi$ ,  $\varphi \Rightarrow \psi$  and  $\chi$ ,  $\psi \Rightarrow \varphi$ )
- **4.** For each of the following pieces of information, tell what if anything you can conclude about the possibilities left open and the possibilities ruled out by the sentence  $\varphi$ :
  - **a.**  $\phi$  is equivalent to a tautology  $\psi$
  - **b.**  $\varphi$  entails  $\top$
  - **c.** a tautology  $\psi$  entails  $\varphi$
  - **d.**  $\phi$  is equivalent to  $\perp$
  - **e.**  $\phi$  entails an absurdity  $\psi$
  - **f.**  $\perp$  entails  $\varphi$
