Phi 270 F09 test 2

Analyze each sentence below in as much detail as possible, presenting the result in *both symbols and English notation*. Provide a key to your abbreviations of unanalyzed components, and be sure that they are complete and independent sentences. Try to respect any grouping in the English.

- 1. Either the demand was greater than expected or the backup unit wasn't ready.
- 2. Ann and Bill were not both notified, but neither needed a reminder.

Synthesize an English sentence (the more idiomatic the better) that has the following analysis:

3. $\neg S \land T$ (S: Sam heard the siren; T: Tom heard the siren)

Use derivations to check whether each of the claims of entailment below holds. If one fails, present a counterexample by providing a table in which you calculate the truth values of the premises and conclusion on an extensional interpretation (i.e., an assignment of truth values) that divides an open gap.

Do not use attachment or detachment rules in **4-6**. That is, do not use Adj or the rules MTP, MPT, and Wk of §4.3; instead use only the basic rules for exploiting resources, planning for goals, and closing gaps.

- **4.** $\neg B \models \neg (A \land B)$
- 5. $\neg (A \land B) \models B$
- **6.** $(A \wedge B) \vee (B \wedge C) \models B$

You *may* use attachment and detachment rules in 7. They can be used to shorten the derivation somewhat; but, of course, it can also be completed without using them.

7. B,
$$\neg$$
 (B \land C) \vDash \neg C \lor A

Phi 270 F09 test 2 answers

- Either the demand was greater than expected or the backup unit wasn't ready
 - the demand was greater than expected \lor the backup unit wasn't ready
 - the demand was greater than expected $\lor \neg$ the backup unit was ready

$$G \lor \neg B$$
 either G or not B

 $B\!:$ the backup unit was ready; $G\!:$ the demand was greater than expected

2. Ann and Bill were not both notified, but neither needed a reminder

Ann and Bill were not both notified \land neither Ann nor Bill needed a reminder

- \neg Ann and Bill were both notified \land \neg either Ann or Bill needed a reminder
- \neg (Ann was notified \land Bill was notified) $\land \neg$ (Ann needed a reminder \lor Bill needed a reminder)

$$\neg (A \land B) \land \neg (N \lor L)$$

both not both A and B and not either N or L

A: Ann was notified; B: Bill was notified; L: Bill needed a reminder;

N: Ann needed a reminder

 $[\neg A \lor \neg B \text{ is also correct for the first conjunct and } \neg N \land \neg L \text{ is correct for the second}]$

- 3. $\neg S \land T$ (S: Sam heard the siren; T: Tom heard the siren)
 - ¬ Sam heard the siren ∧ Tom heard the siren
 - ¬ Sam heard the siren ∧ Tom heard the siren

Sam didn't hear the siren \land Tom heard the siren

Sam didn't hear the siren, but Tom did

4.

2 CR

The first interpretation divides both gaps; the second is another way of dividing the second gap.

$$\begin{array}{c|ccc} A & B & \neg & (A \land B) / B \\ \hline F & F & \hline{} & F & \hline{} & \hline{} & \hline{} & \hline{} & \hline{} & \hline{} \\ T & F & \hline{} & \hline{} & F & \hline{} & \hline{} & \hline{} & \hline{} \\ \end{array}$$

7. There are many possible answers; the following are only two samples:

Phi 270 F08 test 2

Analyze each sentence below in as much detail as possible, presenting the result in *both symbols and English notation* (i.e., using \land , etc. and also both ... and, etc.). Be sure that the unanalyzed components of your answer are complete and independent sentences, and try to respect any grouping in the English.

- 1. Neither Ann nor Bill got the joke, but Carol did.
- 2. Either Ann didn't reach Bill, or he wasn't both free and able to help her.

Synthesize an English sentence (the more idiomatic the better) that has the following analysis:

3. \neg (B \vee M) (B: Sam had heard of the book; M: Sam had heard of the movie)

Use derivations to check whether each of the entailments below holds. If one fails, present a counterexample by providing a table in which you calculate the truth values of the premises and conclusion on an extensional interpretation (i.e., an assignment of truth values) that divides an open gap.

Do not use attachment or detachment rules in **4-6**. That is, do not use Adj or the rules MTP, MPT, and Wk of §4.3; instead use only the basic rules for exploiting resources, planning for goals, and closing gaps.

- **4.** $A \land \neg B \models \neg (C \land B) \land A$
- 5. $\neg (A \land B), A \models \neg B$
- **6.** $B \lor A \models C \lor B$

For 7 you should show the *first stage of each* of the possible ways of beginning the derivation with the basic rules (i.e., the rules allowed in 4-6); and you should *complete one* of these derivations. In completing it, you *may* use attachment and detachment rules (and their use can simplify the derivation).

7. $B \lor A \models A \lor B$

Phi 270 F08 test 2 answers

- Neither Ann nor Bill got the joke, but Carol did Neither Ann nor Bill got the joke ∧ Carol got the joke
 - \neg either Ann or Bill got the joke \land Carol got the joke
 - \neg (Ann got the joke $\lor Bill$ got the joke) \land Carol got the joke

$$\neg (A \lor B) \land C$$

both not either A or B and C

A: Ann got the joke; B: Bill got the joke; C: Carol got the joke $[(\neg A \land \neg B) \land C \text{ is also correct}]$

2. Either Ann didn't reach Bill, or he wasn't both free and able to help her

Ann didn't reach Bill \vee Bill wasn't both free and able to help Ann

- \neg Ann reached Bill $\lor \neg$ Bill was both free and able to help Ann
- ¬ Ann reached Bill \lor ¬ (Bill was free \land Bill was able to help Ann) ¬ R \lor ¬ (F \land A)

either not R or not both F and A

A: Bill was able to help Ann; F: Bill was free; R: Ann reached Bill

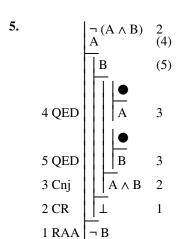

- 3. \neg (B \vee M) (B: Sam had heard of the book; M: Sam had heard of the movie)
 - \neg (Sam had heard of the book \lor Sam had heard of the movie)
 - ¬ Sam had heard of either the book or the movie

Sam had heard of neither the book nor the movie \emph{or}

Sam hadn't heard of either the book or the movie

7. The first stages of the three derivations below show the possible ways of beginning, and the full derivations illustrate some of the ways the derivation could be completed. (You were required to complete only one derivation.)

Phi 270 F06 test 2

Analyze each sentence below in as much detail as possible, presenting the result in *both symbols and English notation* (using both ... and, etc., as well as \land , etc.). Be sure that the unanalyzed components of your answer are complete and independent sentences; also try to respect any grouping in the English.

- 1. Sam was cool, but he was not both calm and collected.
- **2.** Tom spoke to either Al or Barb but to neither Carol nor Dave. Synthesize an English sentence (the more idiomatic the better) that has the following analysis:
 - 3. $\neg E \lor F$ (E: Ed worked last weekend; F: Fred worked last weekend)

Use derivations to check whether each of the entailments below holds. If one fails, present a counterexample by providing a table in which you calculate the truth values of the premises and conclusion on an extensional interpretation (i.e., an assignment of truth values) that divides an open gap.

Do not use attachment or detachment rules in **4-6**. That is, do not use Adj or the rules MTP, MPT, and Wk of §4.3; instead use only the basic rules for exploiting resources, planning for goals, and closing gaps.

- **4.** $A \wedge B \models \neg (C \wedge \neg B)$
- 5. $\neg (A \land B), \neg A \models B$
- **6.** C, $A \lor B \models A \lor (B \land C)$

In 7 you *may* use attachment and detachment rules (and their use can simplify the derivation).

7. $\neg (A \land C), A \lor B \vDash B \lor \neg C$

Phi 270 F06 test 2 answers

1. Sam was cool, but he was not both calm and collected Sam was cool \land Sam was not both calm and collected Sam was cool \land ¬ Sam was both calm and collected Sam was cool \land ¬ (Sam was calm \land Sam was collected) $L \land \neg (M \land T)$

$$L \wedge \neg (M \wedge T)$$

both L and not both M and T

L: Sam was cool; M: Sam was calm; T: Sam was collected

2. Tom spoke to either Al or Barb but to neither Carol nor Dave Tom spoke to either Al or Barb \land Tom spoke to neither Carol nor Dave

(Tom spoke to Al \lor Tom spoke to Barb) $\land \neg$ Tom spoke to either Carol or Dave

(Tom spoke to Al \vee Tom spoke to Barb) $\wedge \neg$ (Tom spoke to Carol \vee Tom spoke to Dave)

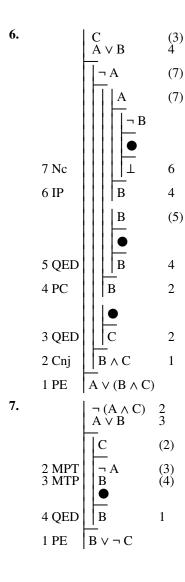

$$(A \lor B) \land \neg (C \lor D)$$

both either A or B and not either C or D

A: Tom spoke to Al; B: Tom spoke to Barb; C: Tom spoke to Carol; D: Tom spoke to Dave

- 3. ¬E∨F (E: Ed worked last weekend; F: Fred worked last weekend)
 ¬Ed worked last weekend ∨ Fred worked last weekend
 Ed didn't work last weekend ∨ Fred worked last weekend
 Fither Fd didn't work last weekend or Fred did

5.

Phi 270 F05 test 2

Complete the following to give a definition in terms of truth values and possible worlds.

- 1. ϕ and ψ are mutually exclusive (i.e., ϕ , $\psi \vDash \bot$) if and only if ... Analyze each sentence below in as much detail as possible, presenting the result using both in symbols and using English notation (i.e., both ... and, etc.). Be sure that the unanalyzed components of your answer are complete and independent sentences; also try to respect any grouping in the English.
 - 2. The job didn't have both good pay and flexible hours, and Sam didn't apply for it.
 - 3. Although neither Luke nor Mary saw the movie, either Nancy or Oscar did.

Use derivations to check whether each of the entailments below holds. If one fails, present a counterexample by providing a table in which you calculate the truth values of the premises and conclusion on an extensional interpretation (i.e., an assignment of truth values) that divides an open gap.

Do not use attachment or detachment rules in **4-6**. That is, do not use Adj or the rules MTP, MPT, and Wk of §4.3; instead use only the basic rules for exploiting resources, planning for goals, and closing gaps.

4.
$$\neg B \models \neg (A \land (B \land C))$$

5.
$$\neg (A \land B) \vDash \neg A$$

6.
$$(A \land B) \lor C \models C \lor B$$

In 7 you *may* use attachment and detachment rules (and their use can simplify the derivation).

7.
$$A \vee B, \neg (B \wedge C), C \models A$$

Phi 270 F05 test 2 answers

- 1. ϕ and ψ are mutually exclusive if and only if there is no possible world in which both are true (or: ... if and only if, in every possible world, at least one is false)
- 2. The job didn't have both good pay and flexible hours, and Sam didn't apply for it

The job didn't have both good pay and flexible hours \land Sam didn't apply for the job

- \neg the job had both good pay and flexible hours \land \neg Sam applied for the job
- ¬ (the job had good pay \land the job had flexible hours) \land ¬ Sam applied for the job

$$\neg (G \land F) \land \neg A$$

both not both G and F and not A

A: Sam applied for the job; F: the job had flexible hours; G: the job had good pay

 $(\neg G \land \neg F) \land \neg A$ would say that the job had neither good pay nor flexible hours, so it is not equivalent to $\neg (G \land F) \land \neg A$ and it's not correct; $(\neg G \lor \neg F) \land \neg A$ would be equivalent, but it is pretty far from the form of the English.

3. Although neither Luke nor Mary saw the movie, either Nancy or Oscar did.

neither Luke nor Mary saw the movie $\ensuremath{\wedge}$ either Nancy or Oscar saw the movie

- \neg either Luke or Mary saw the movie \land (Nancy saw the movie \lor Oscar saw the movie)
- ¬ (Luke saw the movie \lor Mary saw the movie) \land (Nancy saw the movie \lor Oscar saw the movie)

$$\neg (L \lor M) \land (N \lor O)$$

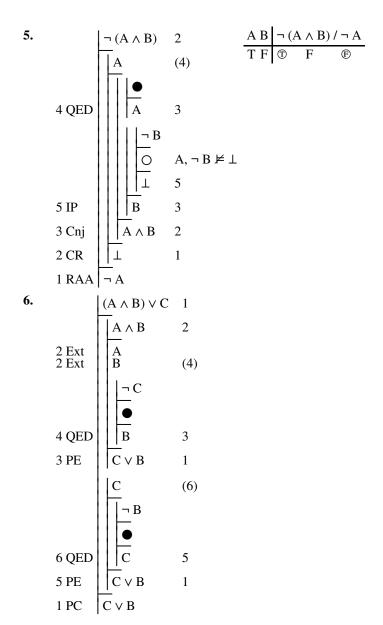

both not either L or M and either N or O

L: Luke saw the movie; M: Mary saw the movie; N: Nancy saw the movie; O: Oscar saw the movie

 $(\neg\,L\wedge\neg\,M)\wedge(N\vee O)$ is equivalent to the answer above and is also correct.

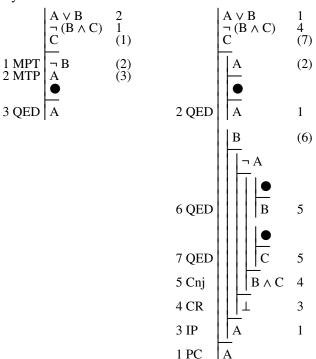

4.

- 7. [This question was on a topic not covered in F08] Use replacement principles to put the following sentence into disjunctive normal form (in which there are no negated compounds and no conjunction has a disjunction as a component):

$$\neg ((A \land \neg B) \lor C)$$

Phi 270 F99 test 2 answers

1. Fred crossed the desert without having both a jack and a spare tire

Fred crossed the desert $\land \neg$ Fred had both a jack and a spare tire Fred crossed the desert $\land \neg$ (Fred had a jack \land Fred had a spare tire)

$$D \wedge \neg (J \wedge S)$$

both D and not both J and S

D: Fred crossed the desert; J: Fred had a jack; S: Fred had a spare tire

2. Bob either found someone to go or went himself, but neither Carol nor her luggage was there

Bob either found someone to go or went himself \land neither Carol nor her luggage was there

(Bob found someone to go \vee Bob went himself) $\wedge \neg$ either Carol or

her luggage was there

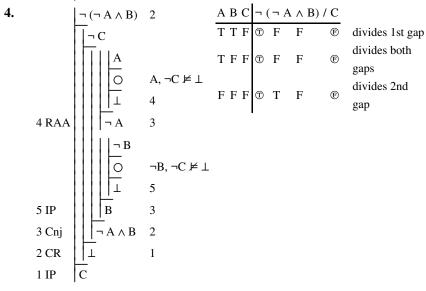

(Bob found someone to go \vee Bob went himself) $\wedge \neg$ (Carol was there \vee Carol's luggage was there)

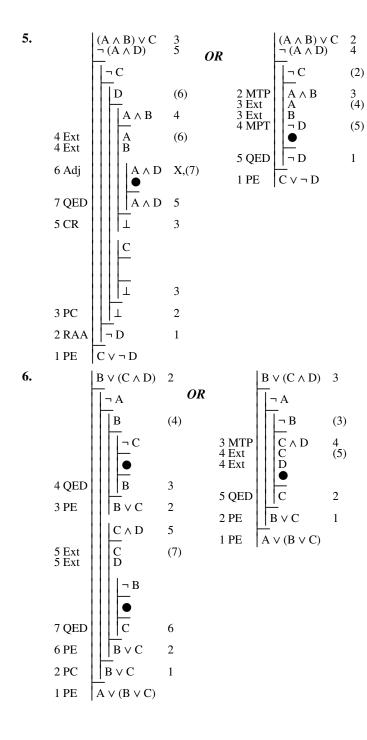

$$(F \lor W) \land \neg (C \lor L)$$

both either F or W and not either C or L

F: Bob found someone to go; W:Bob went himself; C: Carol was there; L: Carol's luggage was there

3.
$$\begin{vmatrix}
A \land \neg B & 1 \\
A & \neg B & 1
\end{vmatrix}$$

7. [This question was on a topic not covered in F08]

$$\neg ((A \land \neg B) \lor C)$$

 \simeq

$$\neg (A \land \neg B) \land \neg C$$

$$\simeq$$

 $(\neg A \lor B) \land \neg C$

~

$$(\neg \ A \land \neg \ C) \lor (B \land \neg \ C)$$

Phi 270 F98 test 2

1. Analyze the sentence below in as much detail as possible and express the result in both symbolic and English notation. Be sure that the unanalyzed components of your answer are complete and independent sentences and try to respect any grouping in the original sentence.

Bob didn't have both fuel and either a match or a lighter

2. Synthesize an idiomatic English sentence expressing the proposition which is assigned to the symbolic form below by the intensional interpretation to its right—i.e., give an English sentence whose analysis would be the following:

$$\neg ((A \land B) \lor (N \land L))$$

A: Carol saw Ann; B: Carol saw Bill; N: Dave saw Ann; L: Dave saw Bill

Use derivations to check each of the following claims of entailment. You may use the detachment rule MPT but not MTP; although the use of MPT is not necessary, it can shorten a couple of the derivations. If a derivation fails, present a counterexample that divides an open gap.

- 3. $B \models \neg (A \land \neg B)$
- **4.** $\neg (A \land B) \models \neg (C \land \neg B)$
- 5. $\neg (A \land \neg (B \land C)) \vDash \neg (A \land \neg C)$
- **6.** $A \lor (B \land C) \models C \lor A$

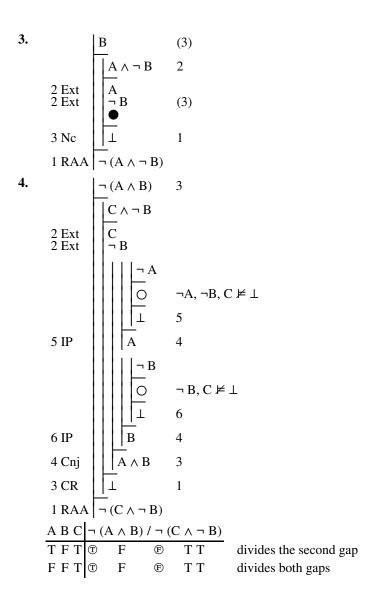

Phi 270 F98 test 2 answers

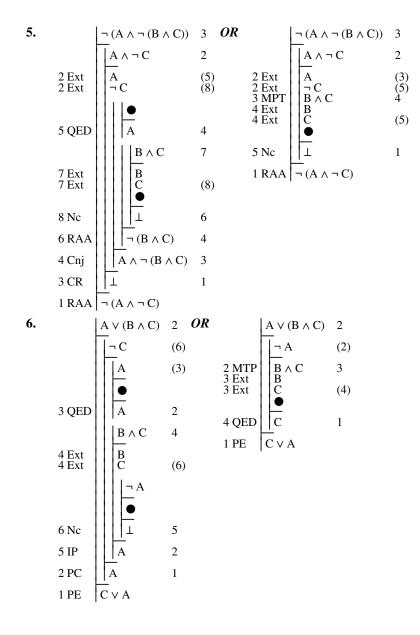

- 1. ¬ Bob had both fuel and either a match or a lighter
 - \neg (Bob had fuel \land Bob had either a match or a lighter)
 - ¬ (Bob had fuel \land (Bob had a match \lor Bob had a lighter))
 ¬ (F \land (M \lor L))

not both F and either M or L

F: Bob had fuel; L: Bob had a lighter; M: Bob had a match

- 2. \neg ((Carol saw Ann \land Carol saw Bill) \lor (Dave saw Ann \land Dave saw Bill))
 - \neg (Carol saw both Ann and Bill \lor Dave saw both Ann and Bill) Neither Carol nor Dave saw both Ann and Bill

Phi 270 F97 test 2

1. Analyze the sentence below in as much detail as possible and express the result in both symbolic and English notation. Be sure that the unanalyzed components of your answer are complete and independent sentences and try to respect any grouping in the original sentence.

Sam didn't both find the problem and fix it, but either it went away on its own or there was no problem to begin with

2. Synthesize an idiomatic English sentence expressing the proposition which is assigned to the symbolic form below by the intensional interpretation to its right—i.e., give an English sentence whose analysis would be the following:

$$\neg (D \lor M) \land H$$

D: Al had directions; H: Al made it home; M: Al had a map Check each of the following claims of entailment. *Do not use* attachment rules but you may use detachment rules. If a derivation fails, present a counterexample that divides its premises from its conclusion.

- 3. $\neg B \models \neg (A \land (B \land C))$
- **4.** $A \lor B \models C \lor B$
- **5.** Use derivations to show the following entailment. You *may use* attachment rules and using them may make the derivation somewhat shorter.

$$\neg \ ((A \lor B) \land \neg \ C), \ A \vDash C$$

6. [This question was on a topic not covered in F08] Use a series of replacements to show the following:

$$\neg \ (A \lor (B \land C)) \simeq \neg \ (A \lor B) \lor (\neg \ A \land \neg \ C)$$

Phi 270 F97 test 2 answers

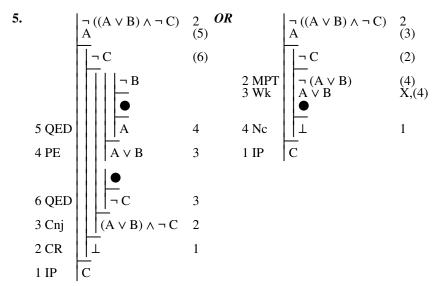

- 1. Sam didn't both find the problem and fix it \land either the problem went away on its own or there was no problem to begin with
 - ¬ Sam found the problem and fixed it \land (the problem went away on its own \lor there was no problem to begin with)
 - ¬ (Sam found the problem \land Sam fixed the problem) \land (the problem went away on its own \lor ¬ there was a problem to begin with)

$$\neg (F \land D) \land (A \lor \neg P)$$

both not both F and D and either A or not P

A: the problem went away on its own; D: Sam fixed the problem; F: Sam found the problem; P: there was a problem to begin with

- 2. ¬ (Al had directions ∨ Al had a map) ∧ Al made it home ¬ Al had directions or a map ∧ Al made it home Al had neither directions nor a map ∧ Al made it home Al had neither directions nor a map but he made it home

6. [This question was on a topic not covered in F08]

$$\neg (A \lor (B \land C))$$

$$\simeq$$

$$\neg A \land \neg (B \land C)$$

$$\simeq$$

$$\neg A \land (\neg B \lor \neg C)$$

$$\simeq$$

$$(\neg A \land \neg B) \lor (\neg A \land \neg C)$$

$$\simeq$$

$$\neg (A \lor B) \lor (\neg A \land \neg C)$$

Phi 270 F96 test 2

1. Analyze the sentence below in as much detail as possible. Be sure that the unanalyzed components of your answer are complete and independent sentences and that you respect any grouping in the English.

Either Bob didn't call or neither Alice nor Carol was home

2. Synthesize an idiomatic English sentence expressing the proposition which is assigned to the symbolic form below by the intensional interpretation to its right—i.e., give an English sentence whose analysis would be the following:

$$P \land \neg (S \land V)$$

P: Ralph went to Portland; S: Ralph went to Seattle; V: Ralph went to Vancouver

Check each of the following claims of entailment. Do not use detachment or attachment rules. If a derivation fails, present a counterexample that divides an open gap.

- 3. $A \land \neg B \vDash \neg (B \land C)$
- 4. $A \land \neg B, B \lor C \models A \land C$
- 5. $\neg (A \land \neg B) \models A \lor B$
- **6.** [This question was on a topic not covered in F08] Use a series of replacements to show the following:

$$\neg A \land \neg (B \land C) \simeq \neg (A \lor B) \lor \neg (A \lor C)$$

Phi 270 F96 test 2 answers

- 1. Bob didn't call v neither Alice nor Carol was home
 - \neg Bob called $\lor \neg$ (Alice was home \lor Carol was home)

$$\neg B \lor \neg (A \lor C)$$

either not B or not either A or C

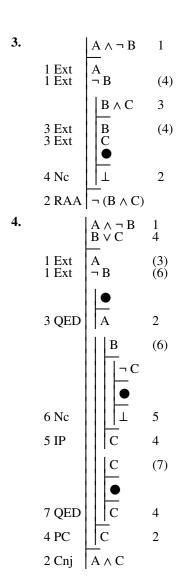

A: Alice was home; B: Bob called; C: Carol was home

2. Ralph went to Portland $\land \neg$ (Ralph went to Seattle \land Ralph went to Vancouver)

Ralph went to Portland $\land \neg$ Ralph went to both Seattle and Vancouver

Ralph went to Portland \land Ralph didn't go to both Seattle and Vancouver

Ralph went to Portland but he didn't go to both Seattle and Vancouver

6. [This question was on a topic not covered in F08]

 $\neg A \land \neg (B \land C)$ \simeq $\neg A \land (\neg B \lor \neg C)$ \simeq $(\neg A \land \neg B) \lor (\neg A \land \neg C)$ \simeq $\neg (A \lor B) \lor \neg (A \lor C)$
