Homework on §7.1—assigned Mon 10/31 and due Wed 11/2

For each of the sentences (i) and (ii) below, take each of the following initial steps in analysis:

• Restate the sentence by expanding on a quantifier phrase. That is, make the quantifier phrase the subject followed by is such that, using a pronoun to fill the blank where the quantifier phrase was originally. (If your restatement sounds odd, you may not have identified the full quantifier phrase.)

• Mark the class indicator of the quantifier phrase, and note any bounds or exception indicator.

• Describe the sort of thing that would count as a counterexample to the generalization; this will be something in the domain of the generalization that *lacks* the attribute of the generalization

• Classify the generalization as affirmative or negative and as direct or complementary.

(i) Al located every part of the machine and labeled it.

(ii) Bill found only <u>old</u> movies in the bin.
