Computational Science at Wabash College

William J. Turner
Department of Mathematics & Computer Science

Ides of August
21 August 2009
Computer Science Minor

Courses Offered

- CSC 111 Introduction to Computer Science (CS1)
- CSC 112 Advanced Programming (CS2)
- CSC 211 Introduction to Data Structures (CS3)
- CSC 311 Introduction to Machine Organization (CO1)
- CSC 321 Programming Languages (CO4)
- CSC 331 Analysis of Algorithms (CO2)
- CSC 341 Introduction to Automata, Computability, and Formal Languages (CO3)

Required for minor:
- Five computer science courses, including CSC 111, 112
- Discrete mathematics course (MAT 108 or 219)
Courses Offered

CSC 111 Introduction to Computer Science (CS1)
CSC 112 Advanced Programming (CS2)
CSC 211 Introduction to Data Structures (CS3)
CSC 311 Introduction to Machine Organization (CO1)
CSC 321 Programming Languages (CO4)
CSC 331 Analysis of Algorithms (CO2)
CSC 341 Introduction to Automata, Computability, and Formal Languages (CO3)
# Computer Science Minor

## Required for minor:
- Five computer science courses, including CSC 111, 112
- Discrete mathematics course (MAT 108 or 219)
CSC 101 Introduction to Computer Science

Not a programming course
- CS0
- CSC 111 Introduction to Programming

Introduction to the field of computer science
- Data storage and manipulation
- Operating systems
- Networking
- Algorithms
- Programming languages
- Artificial Intelligence
- Theory of computation
Computational Mathematics Track

Requirements

- Calculus I (111), Calculus II (112), Linear Algebra (223), and Abstract Algebra (331)
- Differential Equations (224)
- Numerical Methods (337) or Topics in Computational Mathematics (338)
- One additional course from 219, 226, 314, 337, and 338
- Electives to reach nine credit minimum
Computational Mathematics Track

Requirements

- Calculus I (111), Calculus II (112), Linear Algebra (223), and Abstract Algebra (331)
- Differential Equations (224)
- Numerical Methods (337) or Topics in Computational Mathematics (338)
- One additional course from 219, 226, 314, 337, and 338
- Electives to reach nine credit minimum

Pure Track

- Calculus I (111), Calculus II (112), Linear Algebra (223), and Abstract Algebra (331)
- Real Analysis (333) or Topology (341)
- Electives to reach nine credit minimum
Surveys

- Computer science alumni
- Computer science and mathematics students
- Wabash faculty
- Computer science educators (ACM SIGCSE)
My Project – Program Review

**Surveys**
- Computer science alumni
- Computer science and mathematics students
- Wabash faculty
- Computer science educators (ACM SIGCSE)

**Computer science education conferences**
- ACM SIGCSE Technical Symposium
- Consortium for Computer Science in Colleges (CCSC)
My Project – Program Review

Surveys

- Computer science alumni
- Computer science and mathematics students
- Wabash faculty
- Computer science educators (ACM SIGCSE)

Computer science education conferences

- ACM SIGCSE Technical Symposium
- Consortium for Computer Science in Colleges (CCSC)

Review curricular models

- IEEE/ACM
- Liberal Arts Computer Science Consortium (LACS)
- Other institutions
Curricular Model Changes

Language of CS1

- Java
- C++
- Scheme
- Python
## Curricular Model Changes

### Language of CS1
- Java
- C++
- Scheme
- Python

### Shift introductory sequence
- Introduction to Programming
- Introduction to Data Structures
- Advanced Programming (Second language?)

---

W. J. Turner

Computational Science

21 Aug 09 6 / 13
## Curricular Model Changes

### Language of CS1
- Java
- C++
- Scheme
- Python

### Shift introductory sequence
- Introduction to Programming
- Introduction to Data Structures
- Advanced Programming (Second language?)

### Combining and redistributing content of core courses
CO1, CO2, CO3, CO4
Alumni said...

**Received good foundation**
- Good general overview and theoretical foundation
- Emphasis on concepts, algorithms, logic, problem solving
- Ability think about problems and master tools at disposal
- Advantage over peers in graduate school and careers

**Suggest more applications and courses (many applied)**
- Artificial intelligence
- Databases
- Networks
- Parallel computing
- Electronics
- Physical devices
- Communications technologies
- Practical business applications

Received good foundation

- Good general overview and theoretical foundation
- Emphasis on concepts, algorithms, logic, problem solving
- Ability to think about problems and master tools at disposal
- Advantage over peers in graduate school and careers

Suggest more applications and courses (many applied)

- Artificial intelligence
- Databases
- Networks
- Parallel computing
- Electronics
- Physical devices
- Communications technologies
- Practical business applications

Suggest a computer science major
Students said...

Strong interest in computational track

- Long list of requirements
- CSC 111 hidden

Want more computer science and computational courses

Robotics
Modeling
Web design
Data security

Want a computer science major
Do not see computational mathematics as a substitute

Many say computer science minor would be useful to their students

Other courses:
- Informatics
- Database management
- Modeling
- Simulation
- Hardware interfacing
- Interface with economics

Other languages:
- Perl
- Visual Basic
- R, Stata
- Javascript, Actionscript
Many project opportunities

- Database management
- Econometrics
- Collaborations with art and psychology students
- Historical simulations
- Cognitive science
- Linguistics
- Neural networks
- Hardware control GUI programming
Small liberal arts institutions
Fewer than 2500 students
More in Dept. of C.S. than in combined Dept. of Math. & C.S.
Almost all offer a major
More applied than theoretical
Many offer CS0, but unrelated to the program
Follow IEEE/ACM guidelines to varying degrees
Computational Mathematics
May cause department to move apart

# Recommendations – Computational Mathematics Track

## Proposed changes

- Explicitly list CSC 111
- Eliminate requirement for MAT 224
- Eliminate requirement for additional course from 219, 226, 314, 337, and 338

## Proposed Requirements

- Calculus I (111), Calculus II (112), Linear Algebra (223), and Abstract Algebra (331)
- Introduction to Programming (CSC 111)
- Numerical Methods (337) or Topics in Computational Mathematics (338)
- Electives to reach minimum of nine credits in mathematics
Recommendations – Computer Science Minor

Proposed changes

- Eliminate CSC 112
- Create CSC 121 Intro. to Additional Programming Languages
- Retain current CSC 3X1 courses
- Develop new 300-level courses through CSC 271

Proposed Requirements for Minor:

- Five CS courses, incl. CSC 111, 211, and at least half-credit of 121
- MAT 108 or 219
Recommendations – Computer Science Minor

Proposed changes

- Eliminate CSC 112
- Create CSC 121 Intro. to Additional Programming Languages
- Retain current CSC 3X1 courses
- Develop new 300-level courses through CSC 271

Proposed Requirements for Minor:

- Five CS courses, incl. CSC 111, 211, and at least half-credit of 121
- MAT 108 or 219

Long-term

- Expand our offerings
- Develop relationships with other programs
- Develop a computer science major
